Dynasty Warriors Online is an action-oriented tactical combat game, focusing on frenetic fighting and deadly showdowns against giant hordes on sprawling battlefields.

Dynasty Warriors Online is the first title in the franchise to feature online play. Finally, play against or with your friends to determine the best warrior. Join with friends in a party and complete quests! Unleash your skills in hard-hitting 4-on-4 PvP brawls and 12-on-12 PvP clashes.

Unlike other Dynasty Warriors titles, Dynasty Warriors Online has you create your own, matchless character that can use any weapon! From fans to boomerangs to dual-bladed spears, equipping weapons endows your character with the iconic move sets from favorite characters. Additionally, Dynasty Warriors Online flaunts unique weapons found only in this game.

Players start out as lowly Recruits, but can fight their way up the ranks to become the formidable Great Generals. The new Upgrade Flask system lets players increase their character's attributes in every instance, providing them a chance to customize their strategy mid-battle. It is easy to learn, and mastering it will be essential to a warrior's survival on the battlefield.
