FIFA World Game Modes: - Ultimate Team (FUT) is a free-to-play game mode in FIFA World. In FUT you earn, buy, and transfer global football superstars to create your own unique squad that plays your style of football. Manage your squads, outsmart other gamers in the 24/7 live transfer market, and compete against other gamers in online and single player seasons. Ultimate Team provides a new and exciting experience every week for FIFA World users. New Players are added based on player performances all week throughout the season.

- In League Teams mode, you select the team you would like to compete as in an Online Seasons scenario. Play as your favourite team and climb the leaderboards. Every match you play in League Teams mode uses up one match credit. Your match credits replenish over time or you can buy more with in-game currency. When you win, your match credits replenish faster than when you lose. If you play consecutive matches, they replenish even faster. You receive extra match credits when you get promoted.
