---

A Mystical Land is a fantasy browser based MMO game. The interweave of creative socializing and role-playing elements into the traditional fantasy game play gives freer choice for gamers and thus wider appeals for the game.

There are traditional fantasy role-playing classes like Wizards, Warriors, Archers, and Healers; players may fight and defeat monsters, accept quests to earn rewards and improve their character. More casual activities include fishing, mining, blacksmithing, and cooking. Players can also engage in choosing and decorating a house where they can garden and ranch.

Slaying monsters and pulling off missions for handsome paybacks, as well as awesome equipments for avatars would work out as a stronger motivation than some lofty moralizing stories do.

It will serve as a great alternative to all those grinding elements in other MMORPG's.
