Game producers of the upcoming Heroes & Generals, officially announced that it will be a free to play title.

Heroes & Generals (H&G) is an online Wargame, where the war seems massive and "real", it's mixes realistic first person shooting (FPS) combat with simultaneous, dynamic real time strategy gameplay with thousands of players playing their role in the grand war. The gameplay of Heroes & Generals allows players to participate in the grand online war at hugely different levels. Casual once-a-week FPS gamers can play alongside hardcore 10-hours-a-day master strategists and all players play their role in the grand war, or so it seems from the description of the game producer.
